

THE DESIGN GOAL

The Audiovector QR SPECIAL EDITION series offers advanced technology in a beautifully finished, perfectly proportioned high-end package. An exceptional loudspeaker for all genres of music, the sound is big, bold, and dynamic. At the same time, it is subtle and detailed when you need it to be. The gentle impedance load and high efficiency makes these easily driven speakers an ideal match for both solid state and tube amplifiers.

QR SE

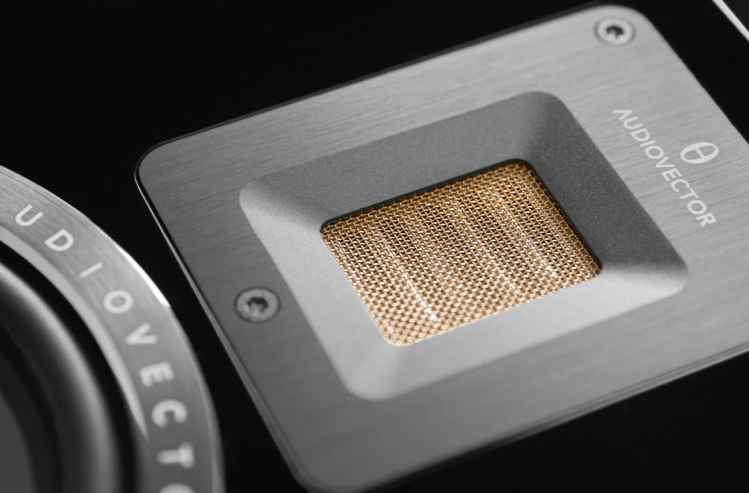

SPECIFICATIONS	QR 7 SE	QR 5 SE	QR 3 SE	QR 1 SE	QR C SE	QR WALL SE	QR SUB SE
Frequency response	27 - 52 kHz	24 - 45 kHz	28 - 45 kHz	44 - 45 kHz	38 - 45 kHz	38 - 45 kHz	20 - 180 Hz

Introducing a new standard in sound
QR SERIES SPECIAL EDITION

AUDIOVECTOR
 Feel the Music

A UNIQUE TWEETER PRINCIPLE: AMT

Precision machined from a single piece of aerospace-grade aluminium. Glass blasted. Brushed. And finally, anodised in a beautiful Tungsten Titanium Grey. The fascia plate features a rose gold plated dispersion mesh, which also works as an S-Stop filter and improves driver integration.

SWEET AND DETAILED SOUND

Inspired by the POP filters used in the professional recording industry, we have engineered a dispersion mesh to sit in front of the QR AMT tweeters. This also works as an S-STOP filter, reducing unwanted sibilants while improving dispersion and integration with the midrange driver. Music never sounded so detailed and so sweet from a loudspeaker in this class. Just sit back and feel the music.

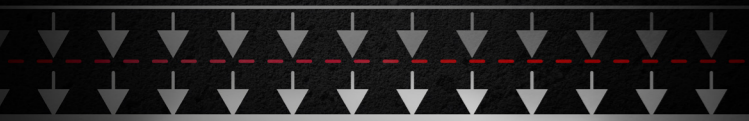

POWERFUL AND PRECISE

A unique new Audiovector drive unit works like a perfect piston over several octaves of the frequency band. This allows us to use amplifier-friendly filters, providing every track with the freedom to sound warm, precise, and detailed - yet dynamic and musical even when using low power amplifiers.

ADVANCED MEMBRANE TECHNOLOGY

We have used our experience with stiff, light, and sound dead membranes in the R series speakers to develop a new sandwich membrane. This innovation combines the strength of aerospace-grade aluminium with the excellent inner damping properties of softer materials. The result is a 3-layer sandwich membrane with no sound of its own and very low distortion, perfect for accurate music reproduction.

Introducing a new standard in sound QR SERIES SPECIAL EDITION

Handmade in Denmark since 1979

QR SPECIAL EDITION

The new QR SPECIAL EDITION is the result of continuous innovation that aims to bring listeners closer to the soul of the original music. You'll notice the improvements from the very first note:

- New in-house designed capacitors result in a cleaner treble and improved detailing.
- Improved heat dissipation via metal housed resistors delivers even more stable high-power precision.
- Cryogenically treated internal wiring improves dynamics and detailing.
- Strategically positioned Nano Pore dampening material enhances midrange openness.
- Bass reflex optimisation increases precision.
- Stainless steel high-end spikes with knurled nuts allows easier micro adjustment.

STYLISH SOUND

The sound is big and bold, pleasant and detailed – excellent for all types of music. The QR SE looks compact and will fit into any home environment. The perfectly detailed and sweet treble promises endless hours of musical joy, and the powerful and dynamic bass will allow any recording to sound its very best.

Add on the fast QR Sub SE, the detailed QR Centre SE, and the easily placed QR Wall SE, and you can immerse yourself in a supremely powerful home cinema solution.

CRYOGENIC TREATMENT

Our new highly specialised double cryogenic polypropylene tin flash copper capacitors are the result of constant listening, measuring, and improving. They provide our AMT tweeters with the best possible conditions for an even sweeter, more detailed, and more open listening experience. The use of cryogenically treated pure copper wiring and Audiovector Nanopore damping material creates a smooth and natural musical reproduction.
