MURANO ALTO

GENEROUS AND FAITHFULL

Assembled with passion in our workshops facing the Atlantic Ocean, Murano Alto is the little high-end floorstanding speaker that exceeds sound expectations. The generous and dynamic combination of the coaxial midrange-tweeter from the flagship L'Océan, with twin honeycomb dome woofers lets you ride all the musical universes with an ever-growing intensity and satisfaction.

MURANO ALTO

COAXIAL MIDRANGE-TWEETER BC13

The heart of the 3-way co-axial TC23, assembled and quality assured in our French workshops and which is fitted to the flagship L'Océan, the BC13 guarantees a faithful straightforward tonal balance without any auditory strain, for a deep and incredibly realistic soundstage. We have fitted it with a new aluminium wave guide specifically designed for optimal output with the Murano bass driver.

HONEYCOMB DOME WOOFER

The new 17ND36 bass driver is specifically developed for Murano speakers. In order to deliver deep yet tight and fast bass from a small volume our engineers have miniaturised the concept of La Sphère's 55cm woofer. The concave honeycomb membrane offers great rigidity and excellent damping which enables a large excursion without deformation. Guided by a long voice coil in the 45mm deep air gap of a 4-kilogram oversized motor, this driver gives the Murano Alto's bass the purity and strength of crystal.

ADJUSTABLE BOTTOM END

Three long, curved and flared port tubes supply a stunning boost to low frequencies, with extension and wealth. The option to seal one port of each speaker provides the choice between maximum bass boost or maximum extension, to suit the room acoustics and musical taste.
